Software Developer | AI Content Creator | Prompt Engineer

Professional Summary

Software developer and digital creator experienced in responsive web applications, Web3 decentralized applications, Telegram Mini Apps, generative AI content, transcription, and digital design. Founder of promptmaster.fun and manager of the Yukensimi channels, with hands-on generative AI experience since 2019. Strong fit for freelance software development, AI evaluation, prompt engineering, linguistic data labeling, transcription, content localization, and technical documentation projects.

Core Skills

- **Web Development:** JavaScript, HTML, CSS, React, Tailwind CSS, Cloudflare Workers, Telegram Mini Apps
- **AI and Data:** Prompt engineering, generative AI video production, audio transcription, language data labeling, content localization
- **Web3 and Blockchain:** Substrate nodes, dApp development, Tanssi Network, Portaldot, Irys, GaiAI, Melody Labs
- **Design and Content:** CorelDRAW, flat vector design, line art, infographics, UI design, Indonesian voiceover scripting
- **Languages:** Indonesian (Native), Sundanese (Native), English (Intermediate)

Professional Experience

Founder and Owner Sep 2026 — Present
promptmaster.fun *Remote*

- Manage and develop a digital resource and engineering platform focused on prompt engineering and AI-assisted workflows.
- Create, test, and optimize prompt structures to produce specific and accurate outputs for user requirements.
- Document repeatable methods and communicate technical concepts clearly for digital and AI-related projects.

Sundanese Transcriber Aug 2026 — Present
Withspout.com *Remote*

- Transcribe Sundanese audio data accurately for linguistic data processing and language model development.
- Review grammar, spelling, terminology, and local cultural context to maintain high-quality transcription data.

Lead Developer May 2026 — Jun 2026
PortalMatch Web3 dApp | Portaldot Hackathon 2026 *Remote*

- Built a privacy-first anonymous matchmaking decentralized application for the Portaldot Hackathon 2026.
- Configured local Substrate nodes and deployed the application on the Portaldot Appchain.
- Authored comprehensive official hackathon submission documentation in English.

Full-Stack Developer Jun 2026 — Jun 2026
Audio Learning App - Emil Krebs Method *Remote*

- Developed an interactive web interface for a 40-day English language course.
- Integrated cloud-based audio assets with secure and responsive user access control.

Telegram Mini App Developer Jun 2025 — Apr 2026
Freelance *Remote*

- Developed and deployed interactive single-page Telegram Mini Apps using React, Tailwind CSS, and Cloudflare Workers.
- Implemented custom UI components with full-screen navigation and haptic feedback for mobile user experience.

AI Content Creator and CorelDRAW Artist 2019 — Present
Yukensimi *Remote*

- Produce and manage AI-generated video content for YouTube and Facebook channels with consistent output since 2019.
- Apply generative AI tools for video production and optimize prompts based on tool capabilities and limitations.
- Create vector assets, technical infographics, sticker layouts, Web3 community materials, and UI assets in CorelDRAW.
- Write concise Indonesian voiceover scripts for product promotions and digital content.

Selected Projects

- **PortalMatch Web3 dApp**: Privacy-first anonymous matchmaking application built for the Portaldot Hackathon 2026. Configured local Substrate nodes, deployed to the Portaldot Appchain, and prepared the English submission documentation.
- **Audio Learning App**: Interactive web interface for a 40-day English course, including cloud-based audio assets and secure responsive access control.
- **Telegram Mini Apps**: Multiple interactive single-page applications built with React, Tailwind CSS, and Cloudflare Workers, including full-screen navigation and haptic feedback.
- **Yukensimi AI Content**: Ongoing AI-generated video production and channel management since 2019, supported by prompt optimization, Indonesian voiceover scripts, and CorelDRAW design assets.

Education

Politeknik Negeri Bandung

Diploma (D3) in Tours and Travel Business

Bandung, West Java, Indonesia

Aug 2016 — Aug 2016

Freelance Focus

AI evaluation and prompt engineering; Indonesian and Sundanese transcription; language data labeling; content localization; JavaScript and React web development; Telegram Mini Apps; Web3 dApp development; technical documentation; CorelDRAW vector design and infographics.
